DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9-13, 17-21, and 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Steinmann.

The Steinmann reference discloses a valve (Figure 16) comprising a housing first portion 744, a housing second portion 718, an electronic controller/electronic board 747 which functions as claimed (see col. 24, line 42-col. 25, last line), a solenoid assembly comprising a drive pin 732, a valve assembly 739, and a magnetic assembly 738, a magnetic positioning/Hall-effect sensor 746, a main connector 748; an operator interface port 750, a protective cap (connector insertable into port, see col. 23, last line), and a chamber 702 with an inlet 752 and an outlet 754.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/735,185

Art Unit: 3751

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steinmann.

The Steinmann reference discloses a valve as discussed supra, but remains silent as to the material of the housing and the electronic board. However, it would have been obvious to make the housing from extruded aluminum and a portion of the electronic board from potting, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In Re Leshin, 125 USPQ 416.

Claims 14 and 22 rejected under 35 U.S.C. 103(a) as being unpatentable over Steinmann in view of Barman.

The Steinmann reference discloses a valve as discussed supra, but does not disclose a wireless transceiver to download operating parameters. However, the Barman reference discloses the use of a wireless interface to download operating parameters to an engine controller (see para. 133) for convenient reprogramming of the controller. It would have been obvious to modify the Steinmann valve to employ a wireless transceiver for convenient reprogramming of the controller.

Allowable Subject Matter

Claims 7, 8, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3751

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter T deVore whose telephone number is (571) 272-4884. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
